SUMMARY

Software Engineer with 2+ years of experience at Tech Mahindra, working on scalable applications using Node.js, TypeScript, and React. Strong focus on backend development with practical experience in integrating frontend features and building APIs. Improved system stability and reduced production issues by optimizing existing services. Experienced in working on microservices that support high-traffic applications.

WORK EXPERIENCE

Tech Mahindra | Jr. Software Engineer

Nov 2023 - Feb 2026

Telecom Domain – RAITT Transformation Project (Telefónica Germany)

- Worked on a large telecom project used by over 45 million customers, focusing on backend stability and availability.
- Built and maintained backend services for the Hansen CPQ system using Node.js, TypeScript, Kafka, and internal microservices.
- Collaborated with frontend developers (React) to design APIs that matched UI requirements and to fix issues across the full flow.
- Took responsibility for key applications, keeping them stable and available even during high-traffic periods.
- Actively participated in backend-frontend discussions to improve system behavior and support UI features by understanding user flows and API usage.
- Supported junior developers by writing documentation and sharing knowledge within the team.

EDUCATION

2020–21 to 2022–23

Bachelor of Computer Applications (BCA)

Savitribai Phule Pune University

SKILLS

- **Backend:** Node.js, Express.js, JavaScript (ES6+), TypeScript, REST APIs, **Microservices**, **Kafka**, Redis, **MongoDB**, SQL, System Design, Elastic search, SonarQube
- **Frontend:** React.js, HTML5, CSS3, **Tailwind CSS**, Redux, Motion, API Integration
- **Cloud & DevOps:** AWS (**Certified AWS Cloud Practitioner**), Docker, Kubernetes, Grafana
- **Tools & Process:** Git, **GitHub**, Jira, Confluence, **Agile/Scrum**, ChatGpt, GitHub-Copilot
