SUMMARY

Software Engineer with 2+ years of experience at Tech Mahindra, working on scalable full-stack systems using Node.js, TypeScript, and React-based frontends. Strong backend expertise with hands-on exposure to frontend integration, UI performance considerations, and API-driven development. Reduced production incidents by 30% through system optimization while contributing to high-availability microservices serving millions of users.

WORK EXPERIENCE

Tech Mahindra | Jr. Software Engineer

Nov 2023 - Feb 2026

Telecom Domain – RAITT Transformation Project (Telefónica Germany)

- Contributed to a large-scale telecom transformation project serving **45M+ customers**, ensuring high availability and backend stability.
- Developed and maintained backend services for the **Hansen CPQ** application using Node.js, TypeScript, Kafka, and internal microservices.
- Worked closely with frontend engineers (**ReactJs**) to align API responses with UI needs and resolve end-to-end issues.
- Took ownership of critical applications, maintaining 99% uptime and ensuring stable **performance** during peak-load conditions.
- Participated in discussions across backend and frontend teams to improve system behavior and supported frontend features by understanding **UI flows**, API usage, and state-related issues.
- Helped junior team members through documentation and regular knowledge sharing.

EDUCATION

Bachelor of Computer Applications (BCA)

2021 - 2023

Savitribai Phule Pune University

SKILLS

- Backend:** Node.js, Express.js, JavaScript (ES6+), TypeScript, REST APIs, **Microservices**, **Kafka**, Redis, **MongoDB**, SQL, System Design, Elastic search, SonarQube
- Frontend:** React.js, HTML5, CSS3, **Tailwind CSS**, Redux, Motion, API Integration
- Cloud & DevOps:** AWS (**Certified AWS Cloud Practitioner**), Docker, Kubernetes, Grafana
- Tools & Process:** Git, **GitHub**, Jira, Confluence, **Agile/Scrum**, ChatGpt, GitHub-Copilot

PERSONAL PROJECT

E-commerce Full-Stack System (Microservices Architecture)

Tech Stack: **Node.js**, Express.js, ReactJs, **TypeScript**, ORM, Redis, Kafka, **JWT**, Elastic Search
